

## Skid Mounted Mobile Flare

### Description

The mobile flare is used for flaring gas on locations where there is no permanent flare system. Our flare system can also be used to vent gases like Nitrogen. A flare is a critical mechanical component for a secure, reliable and efficient discharge and combustion of Hydrocarbons.

- Easy installation and Operation
- Reliable and efficient
- Safe and easy to use

### Flare

Operation height	: 9 meter
Transport dimension	: 250 x 600 cm
Weight	: 3000 kg
Capacity	: 50.000 Nm <sup>3</sup> / day

### Knock-out

Inlet	: 2"
Work pressure	: 4 bar
Design temperature	: -20 / +80 °C
Volume	: 235 liter

**24/7 excelling in services!**
