

Liquid Nitrogen Tank (20.000 L.)

Description

PRS Internationals Liquid Nitrogen Tank (20.000 L.) is mounted within a container chassis by the use of conventional 20ft container connections.

Nitrogen Tank Specs:

Length	: 6.060 mm.
Width	: 2.440 mm.
Height	: 2.590 mm.
Tare Weight	: 11.000 kg.
Max Gross Weight	: 36.000 kg.
Capacity	: net 19.600 ltr. liquid Nitrogen
Maximum working pressure	: 22 Bar

- Liquid nitrogen transport tanks ISO VAC 5200 @ -196 °C
- Super Insulated under vacuum
- Double isolation valves
- Double relief valve safety system fitted
- Drip trays
- Hose connections Acme NIT 150 Coupling

Certification

Build according to EN 13530-2, ADR / RID (2009), IMDG (2008), USDOT CFR49 (2008), TREP, CSC, TIR, LR, CSS.
